

Amendments to the Specification

Please replace the title as follows:

~~SHEET-LIKE ELECTRONIC COMPONENT CLEAN TRANSFER DEVICE AND SHEET-
LIKE ELECTRONIC PRODUCT MANUFACTURING SYSTEM~~
SHEET-LIKE ELECTRONIC COMPONENT CLEAN TRANSFER DEVICE AND SHEET-
LIKE ELECTRONIC COMPONENT MANUFACTURING SYSTEM

Please replace the paragraph beginning on page.11, line 17, to line 30 with the following rewritten paragraph:

It is to be noted that a magnetic fluid seal which stops a magnetic fluid by a magnet ring is provided in a cover gap in the vicinity of a bearing of an arm articulated part 26 of the conveying robot-410 in this example so that generation of dust from a belt, a pulley or a gear in the arm to the outside of the arm is interrupted. Furthermore, when the body of this conveying robot-410 performs the Z axis movement in the vertical direction in order to move up and down the arm 17 of this conveying robot-410, air in the body is taken in and out. However, in this example, a body cover 27 which covers the body is disposed on a side surface of the body, a gap is formed on the inner side of the body cover 27, and a base cover 28 which covers a robot base is attached so that air can be upwardly taken in and downwardly exhausted from the downward cover gap as a vent hole at the side surface lower part of the robot.
